

ABSTRACT

CONTACT AND COMPLEMENTARY WIRE SEAT FOR A PLUG OR A SOCKET IN
INSULATION-PIERCING TERMINAL TECHNOLOGY

A contact (1) for a plug or socket of a quick-connect
5 plug connection, the contact (1) being held mounted in a contact
holder (2) having a region for press-fit gripping a conductor, a
wire holder (7) having at least one wire seat (7.1) for the end of
a wire and the contact (1) engages the wire in the wire seat (7.1),
where according to the invention the contact (1) has at least two
10 press-fit arms (1.4) of curved and/or polygonal section that
contact the wire generally axially.
